Blackstone-NEY Ultrasonics to Unveil Innovative Cleaning Solutions at IMTS 2024

Jamestown, NY July 22, 2024

Blackstone-NEY Ultrasonics, a division of Cleaning Technologies Group and a global leader in cleaning and waste minimization technologies, is excited to announce its participation in IMTS 2024 in Chicago, Illinois. The event will take place from September 9 to 14, 2024, at Booth #338744, where the company will showcase a range of cutting-edge cleaning solutions.

Among the highlights at the booth will be the AgiSonic® Ultrasonic Parts Washer Cleaning system. Constructed entirely from stainless steel, the AgiSonic is specifically engineered for heavy-duty parts washing, featuring vertical parts agitation. Available in three standard sizes, each system incorporates an air-powered agitation platform that facilitates loading and unloading, with parts agitated up to 15 times per minute using a 6" stroke. The system also includes automatic filling and liquid makeup from a customer-supplied source, a pump with a single bag filter, an overflow weir skimmer, automatic oil removal system, and a lift-off lid. Control features such as ultrasonic time, cleaning tank temperature warm-up, filtration, and oil removal are all digitally managed for precision and efficiency.

Visitors to Booth #338744 will have the opportunity to experience firsthand the capabilities of the Aquarius Series, which promises to optimize cleaning operations with versatility and cost-effectiveness.
